## DETAILED ACTION

### *I. Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 4 in part, drawn to compounds of claim 1, compound of formula I without R1 and R2, classified in class 548, subclass 530+.
- II. Claims 2 and 4 in part, drawn to compounds of claim 2, bicyclic compound of formula I, classified in class 548, subclass 473.
- III. Claims 3 and 4 in part, drawn to compounds of formula II, classified in class 548, subclass 476.
- IV. Claims 5-8 drawn to process of preparing organic compounds, variously classified depending on product made.

The inventions are distinct, each from the other because of the following reasons:

Inventions of group I-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, inventions of groups I-IV differ one from the other and vice versa in that they are not shown as capable of use together. Groups I, II and III are drawn to patentably distinct compounds that differ materially in chemical formula and element so much so that a reference that anticipates but one of the inventions would not even render the other obvious. Additionally, group IV is drawn to a process of making a variety of compounds, which are not shown as capable of use with the compounds of claim 1-4, but organic compounds are also capable of being prepared by processes which do not employ the compounds of claims 1-4.

Art Unit: 1626

Additionally, the search required for one of the above inventions is not required for any of the other and thus would require separate search strategies that are not co-extensive. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
